

Please do not make any changes to Indiana's Do Not Call list. It has been wonderful to not be bothered by annoying calls. It is a shame that the Federal restrictions are not as strong as Indiana's. This law has been one of the most helpful and most welcome to Indiana residents. It is a great way to help protect some residents who (primarily elderly) were not brought up to be rude to pesky callers. We pay for the privilege of having a telephone in our homes - for our use, to be in touch with people and companies that we choose to be in contact with us. We do not want to be bothered by sales calls or requests for donations. It is so nice to be able to answer my telephone and not wonder what is on the other end. The high number of Indiana residents that have signed up for the list should be an indication of how desperately needed this kind of protection has been.

Please DO NOT weaken Indiana's wonderful law.
